Subject index to volume 194

Methods

Theoretical

Classical mechanics

Tunneling splittings in model 2D potentials. II. $V(X, Y) = \lambda(X^2 - X_0^2)^2 - CX^2(Y - Y_0) + \frac{1}{2}\Omega^2(Y - Y_0 + CX_0^2/\Omega^2)^2 - C^2X_0^4/2\Omega^2$, V.A. Benderskii, S.Yu. Grebenshchikov and G.V. Mil'nikov 194 (1995) 1

Coupling schemes and perturbative treatments

Character and spectra of triplet states in short polyenes, B.F. Minaev, D. Jonsson, P. Norman and H. Ågren 194 (1995) 19

Transport quantum mechanics

Tunneling splittings in model 2D potentials. II. $V(X, Y) = \lambda(X^2 - X_0^2)^2 - CX^2(Y - Y_0) + \frac{1}{2}\Omega^2(Y - Y_0 + CX_0^2/\Omega^2)^2 - C^2X_0^4/2\Omega^2$, V.A. Benderskii, S.Yu. Grebenshchikov and G.V. Mil'nikov 194 (1995) 1

A simple model for proton transfer, P.M. Kiefer, V.B.P. Leite and R.M. Whitnell 194 (1995) 33

Ab initio schemes for stationary properties

Character and spectra of triplet states in short polyenes, B.F. Minaev, D. Jonsson, P. Norman and H. Ågren 194 (1995) 19

Nonadiabatic coupling of the 1 ^{1}A″ and 2 ^{1}A″ states of ozone, T. Neuheuser, N. Sukumar and S.D. Peyerimhoff 194 (1995) 45

Computational and simulation methods

Tunneling splittings in model 2D potentials. II. $V(X, Y) = \lambda(X^2 - X_0^2)^2 - CX^2(Y - Y_0) + \frac{1}{2}\Omega^2(Y - Y_0 + CX_0^2/\Omega^2)^2 - C^2X_0^4/2\Omega^2$, V.A. Benderskii, S.Yu. Grebenshchikov and G.V. Mil'nikov 194 (1995) 1

Nonadiabatic coupling of the 1 ^{1}A″ and 2 ^{1}A″ states of ozone, T. Neuheuser, N. Sukumar and S.D. Peyerimhoff 194 (1995) 45

Molecular adsorption on ionic substrates: characterization of terrace and step sites, S. Briquez, A. Lakhlifi, S. Picaud and C. Girardet 194 (1995) 65

A multiple scattering EXAFS study of organometallic compounds: $W(CO)_6$ and (1,3,5-trimethylbenzene)$W(CO)_3$, R. Crüsemann, F. Bökman, V. Fritzsche and H. Bertagnolli 194 (1995) 81

Calculation of the asymptotic interaction and modelling of the potential energy curves of OH and OH^+, A.J.C. Varandas and A.I. Voronin 194 (1995) 91
A theoretical investigation of solvatochromism. Application to merocyanines similar to colored forms obtained by flash-photolysis of spiropyrans, A. Botrel, B. Aboab, F. Corre and F. Tonnard 194 (1995) 101
Influence of dichotomic colored energy fluctuations on excitonic optical line shapes of trimers and tetramers, Ch. Warns, I. Barvík, P. Reineker and Th. Neidlinger 194 (1995) 117
Exciton theory of spectra and energy transfer in photosynthesis: spectral hole burning in the antenna of purple bacteria, T.V. Dracheva, V.I. Novoderezhkin and A.P. Razjivin 194 (1995) 223
Temperature dependence of electron–vibronic spectra of photosynthetic systems. Computer simulations and comparison with experiment, T. Pullerits, R. Monshouwer, F. van Mourik and R. van Grondelle 194 (1995) 395

Molecular dynamics and scattering theory
Energy transfer processes and surface corrugation: a combined collision dynamics and experimental study of the Xe–GaSe(001) system, S. Iannotta, C. Gravili, A. Boschetti, A. Cagol and M. Cacciatore 194 (1995) 133

Experimental

Magnetic resonances
EPR properties of the four hemes in the cytochrome subunit of reaction centres from *Rhodopseudomonas viridis*: characterization of the individual hemes, O. Kaminskaya, P.J. Bratt and M.C.W. Evans 194 (1995) 335
High-field EPR on the primary electron donor cation radical in single crystals of heterodimer mutant reaction centers of photosynthetic bacteria – first characterization of the *G*-tensor, M. Huber and J.T. Törring 194 (1995) 379
Exchange of chloride by bromide in the manganese Photosystem-II complex studied by cw- and pulsed-EPR, A. Boussac 194 (1995) 409
ENDOR and ESEEM of the ^{15}N labelled radical cations of chlorophyll **a** and the primary donor P_{700} in Photosystem I, H. Käß, E. Bittersmann-Weidlich, L.-E. Andréasson, B. Bönigk and W. Lubitz 194 (1995) 419
Fluoride substitution in the Mn cluster from Photosystem II: EPR and X-ray absorption spectroscopy studies, V.J. DeRose, M.J. Latimer, J.-L. Zimmermann, I. Mukerji, V.K. Yachandra, K. Sauer and M.P. Klein 194 (1995) 443

Infrared spectroscopy
Molecular adsorption on ionic substrates: characterization of terrace and step sites, S. Briquez, A. Lakhlifi, S. Picaud and C. Girardet 194 (1995) 65
Vibrational study of various crystalline phases of thallium dihydrogen arsenate TlH_2AsO_4. Comparison with thallium dihydrogen phosphate TlH_2PO_4, Z. Ouafik, N. Le Calvé and B. Pasquier 194 (1995) 145
FTIR spectroscopy of the photoreduction of the bacteriopheophytin electron acceptor in reaction centers of *Rb. sphaeroides* and *Rps. viridis*, E. Nabedryk, S. Andrianambinintsoa, D. Dejonghe and J. Breton 194 (1995) 371

Raman spectroscopy
Vibrational study of various crystalline phases of thallium dihydrogen arsenate TlH_2AsO_4. Comparison with thallium dihydrogen phosphate TlH_2PO_4, Z. Ouafik, N. Le Calvé and B. Pasquier 194 (1995) 145

Visible and UV spectroscopy
Vibrational energy dependence of nonradiative decay rate: triplet benzene studied by time-resolved and steady-state photosensitized phosphorescence, Y. Ide and T. Hikida 194 (1995) 159
Densities of states and band widths of excitons in anthracene microcrystallites embedded in PMMA, A.H. Matsui, K. Mizuno, O. Nishi, Y. Matsushima, M. Shimizu, T. Goto and M. Takeshima 194 (1995) 167
Absolute UV and Soft X-ray photoabsorption of ethylene by high resolution dipole (e, e) spectroscopy, G. Cooper, T.N. Olney and C.E. Brion 194 (1995) 175
Energy transfer between antenna complexes in the purple sulfur bacteria *Chromatium tepidum* and *Chromatium vinosum*, J.T.M. Kennis, T.J. Aartsma and J. Amesz 194 (1995) 285
Temperature dependent hole burning of the 684 nm chlorophyll *a* of the isolated reaction center of Photosystem II: confirmation of the linker model, H.-C. Chang, G.J. Small and R. Jankowiak 194 (1995) 323
Triplet–singlet difference spectra of *Rps. viridis* recorded with magneto-optical difference spectroscopy at 1.2–286 K. Temperature dependence of position and width of the long-wavelength absorption band, P. Gast, E.J. Lous and A.J. Hoff 194 (1995) 387

Fluorescence spectroscopy
Solvent relaxation of oxazine-4 in 2-methyltetrahydrofuran, E. Görlach, H. Gygax, P. Lubini and U.P. Wild 194 (1995) 185
Fluorescence-detected two-photon circular dichroism of Gd^{3+} in trigonal $Na_3[Gd(C_4H_4O_5)_3] \cdot 2NaClO_4 \cdot 6H_2O$, K.E. Gunde and F.S. Richardson 194 (1995) 195
Optical and optically detected magnetic resonance investigation on purple photosynthetic bacterial antenna complexes, A. Angerhofer, F. Bornhäuser, A. Gall and R.J. Cogdell 194 (1995) 259
Energy trapping and detrapping in the photosynthetic bacterium *Rhodopseudomonas viridis*: transfer-to-trap-limited dynamics, K. Timpmann, A. Freiberg and V. Sundström 194 (1995) 275
Temperature dependence of electron–vibronic spectra of photosynthetic systems. Computer simulations and comparison with experiment, T. Pullerits, R. Monshouwer, F. van Mourik and R. van Grondelle 194 (1995) 395

Photoelectron and Auger spectroscopy
The thermal ageing of poly(3,4-ethylenedioxythiophene). An investigation by X-ray absorption and X-ray photoelectron spectroscopy, I. Winter, C. Reese, J. Hormes, G. Heywang and F. Jonas 194 (1995) 207

X-ray spectroscopy
A multiple scattering EXAFS study of organometallic compounds: $W(CO)_6$ and (1,3,5-trimethylbenzene)$W(CO)_3$, R. Crüsemann, F. Bökman, V. Fritzsche and H. Bertagnolli 194 (1995) 81
The thermal ageing of poly(3,4-ethylenedioxythiophene). An investigation by X-ray absorption and X-ray photoelectron spectroscopy, I. Winter, C. Reese, J. Hormes, G. Heywang and F. Jonas 194 (1995) 207
Fluoride substitution in the Mn cluster from Photosystem II: EPR and X-ray absorption spectroscopy studies, V.J. DeRose, M.J. Latimer, J.-L. Zimmermann, I. Mukerji, V.K. Yachandra, K. Sauer and M.P. Klein 194 (1995) 443

Laser methods
Ultrafast energy transfer in light-harvesting chlorosomes from the green sulfur bacterium *Chlorobium tepidum*, S. Savikhin, P.I. van Noort, Y. Zhu, S. Lin, R.E. Blankenship and W.S. Struve 194 (1995) 245
Energy transfer in photosystem I. Time resolved fluorescence of the native photosystem I complex and its core complex, L.-O. Pålsson, S.E. Tjus, B. Andersson and T. Gillbro 194 (1995) 291

Picosecond spectroscopy
Solvent relaxation of oxazine-4 in 2-methyltetrahydrofuran, E. Görlach, H. Gygax, P. Lubini and U.P. Wild 194 (1995) 185
Exciton theory of spectra and energy transfer in photosynthesis: spectral hole burning in the antenna of purple bacteria, T.V. Dracheva, V.I. Novoderezhkin and A.P. Razjivin 194 (1995) 223
The application of the energy gap law to the S_1 energies and dynamics of carotenoids, V. Chynwat and H.A. Frank 194 (1995) 237
Energy trapping and detrapping in the photosynthetic bacterium *Rhodopseudomonas viridis*: transfer-to-trap-limited dynamics, K. Timpmann, A. Freiberg and V. Sundström 194 (1995) 275
Energy transfer between antenna complexes in the purple sulfur bacteria *Chromatium tepidum* and *Chromatium vinosum*, J.T.M. Kennis, T.J. Aartsma and J. Amesz 194 (1995) 285
Energy transfer in photosystem I. Time resolved fluorescence of the native photosystem I complex and its core complex, L.-O. Pålsson, S.E. Tjus, B. Andersson and T. Gillbro 194 (1995) 291
Femtosecond transient absorption spectroscopy on the light-harvesting Chl *a*/*b* protein complex of Photosystem II at room temperature and 12 K, T. Bittner, G.P. Wiederrecht, K.-D. Irrgang, G. Renger and M.R. Wasielewski 194 (1995) 311
Primary processes in isolated Photosystem II reaction centres probed by magic angle transient absorption spectroscopy, D.R. Klug, T. Rech, D.M. Joseph, J. Barber, J.R. Durrant and G. Porter 194 (1995) 433

Non-linear optical spectroscopy
Fluorescence-detected two-photon circular dichroism of Gd^{3+} in trigonal $Na_3[Gd(C_4H_4O_5)_3] \cdot 2NaClO_4 \cdot 6H_2O$, K.E. Gunde and F.S. Richardson 194 (1995) 195

Synchrotron spectroscopies
A multiple scattering EXAFS study of organometallic compounds: $W(CO)_6$ and (1,3,5-trimethylbenzene)$W(CO)_3$, R. Crüsemann, F. Bökman, V. Fritzsche and H. Bertagnolli 194 (1995) 81

Multiple resonance spectroscopy
ENDOR and ESEEM of the ^{15}N labelled radical cations of chlorophyll **a** and the primary donor P_{700} in Photosystem I, H. Käß, E. Bittersmann-Weidlich, L.-E. Andréasson, B. Bönigk and W. Lubitz 194 (1995) 419

Atomic and molecular beam techniques
Energy transfer processes and surface corrugation: a combined collision dynamics and experimental study of the Xe–GaSe(001) system, S. Iannotta, C. Gravili, A. Boschetti, A. Cagol and M. Cacciatore 194 (1995) 133
Double ionization of the propyne molecule to ground and electronically excited states of the doubly charged ion, S.R. Andrews, F.M. Harris and D.E. Parry 194 (1995) 215

Time-resolved experiments
Vibrational energy dependence of nonradiative decay rate: triplet benzene studied by time-resolved and steady-state photosensitized phosphorescence, Y. Ide and T. Hikida 194 (1995) 159
Solvent relaxation of oxazine-4 in 2-methyltetrahydrofuran, E. Görlach, H. Gygax, P. Lubini and U.P. Wild 194 (1995) 185
Ultrafast energy transfer in light-harvesting chlorosomes from the green sulfur bacterium *Chlorobium tepidum*, S. Savikhin, P.I. van Noort, Y. Zhu, S. Lin, R.E. Blankenship and W.S. Struve 194 (1995) 245
Energy transfer between antenna complexes in the purple sulfur bacteria *Chromatium tepidum* and *Chromatium vinosum*, J.T.M. Kennis, T.J. Aartsma and J. Amesz 194 (1995) 285
Energy transfer in photosystem I. Time resolved fluorescence of the native photosystem I complex and its core complex, L.-O. Pålsson, S.E. Tjus, B. Andersson and T. Gillbro 194 (1995) 291
Transient absorption changes of a degenerate dimer induced by exciton scattering; implications for Photosystem II of photosynthesis, J.P.M. Schelvis and T.J. Aartsma 194 (1995) 303
Differences in the binding of the primary quinone acceptor in Photosystem I and reaction centres of *Rhodobacter Sphaeroides*-R26 studied with transient EPR spectroscopy, A. van der Est, I. Sieckmann, W. Lubitz and D. Stehlik 194 (1995) 349
Time-resolved W-band (95 GHz) EPR spectroscopy of Zn-substituted reaction centers of *Rhodobacter sphaeroides* R-26, T.F. Prisner, A. van der Est, R. Bittl, W. Lubitz, D. Stehlik and K. Möbius 194 (1995) 361

Mass spectrometry
Double ionization of the propyne molecule to ground and electronically excited states of the doubly charged ion, S.R. Andrews, F.M. Harris and D.E. Parry 194 (1995) 215

Neutron scattering
Vibrational study of various crystalline phases of thallium dihydrogen arsenate TlH_2AsO_4. Comparison with thallium dihydrogen phosphate TlH_2PO_4, Z. Ouafik, N. Le Calvé and B. Pasquier 194 (1995) 145

Objects

Bulk systems

Gases
Vibrational energy dependence of nonradiative decay rate: triplet benzene studied by time-resolved and steady-state photosensitized phosphorescence, Y. Ide and T. Hikida 194 (1995) 159

Liquid mixtures and solutions
Solvent relaxation of oxazine-4 in 2-methyltetrahydrofuran, E. Görlach, H. Gygax, P. Lubini and U.P. Wild 194 (1995) 185

Crystals
Vibrational study of various crystalline phases of thallium dihydrogen arsenate TlH_2AsO_4. Comparison with thallium dihydrogen phosphate TlH_2PO_4, Z. Ouafik, N. Le Calvé and B. Pasquier 194 (1995) 145

Densities of states and band widths of excitons in anthracene microcrystallites embedded in PMMA, A.H. Matsui, K. Mizuno, O. Nishi, Y. Matsushima, M. Shimizu, T. Goto and M. Takeshima 194 (1995) 167

-neat

Fluorescence-detected two-photon circular dichroism of Gd^{3+} in trigonal $Na_3[Gd(C_4H_4O_5)_3] \cdot 2NaClO_4 \cdot 6H_2O$, K.E. Gunde and F.S. Richardson 194 (1995) 195

High-field EPR on the primary electron donor cation radical in single crystals of heterodimer mutant reaction centers of photosynthetic bacteria – first characterization of the *G*-tensor, M. Huber and J.T. Törring 194 (1995) 379

Glasses

Temperature dependent hole burning of the 684 nm chlorophyll *a* of the isolated reaction center of Photosystem II: confirmation of the linker model, H.-C. Chang, G.J. Small and R. Jankowiak 194 (1995) 323

Polymers

The thermal ageing of poly(3,4-ethylenedioxythiophene). An investigation by X-ray absorption and X-ray photoelectron spectroscopy, I. Winter, C. Reese, J. Hormes, G. Heywang and F. Jonas 194 (1995) 207

Surfaces

Molecular adsorption on ionic substrates: characterization of terrace and step sites, S. Briquez, A. Lakhlifi, S. Picaud and C. Girardet 194 (1995) 65

Energy transfer processes and surface corrugation: a combined collision dynamics and experimental study of the Xe–GaSe(001) system, S. Iannotta, C. Gravili, A. Boschetti, A. Cagol and M. Cacciatore 194 (1995) 133

Biological systems

Exciton theory of spectra and energy transfer in photosynthesis: spectral hole burning in the antenna of purple bacteria, T.V. Dracheva, V.I. Novoderezhkin and A.P. Razjivin 194 (1995) 223

Ultrafast energy transfer in light-harvesting chlorosomes from the green sulfur bacterium *Chlorobium tepidum*, S. Savikhin, P.I. van Noort, Y. Zhu, S. Lin, R.E. Blankenship and W.S. Struve 194 (1995) 245

Optical and optically detected magnetic resonance investigation on purple photosynthetic bacterial antenna complexes, A. Angerhofer, F. Bornhäuser, A. Gall and R.J. Cogdell 194 (1995) 259

Energy trapping and detrapping in the photosynthetic bacterium *Rhodopseudomonas viridis*: transfer-to-trap-limited dynamics, K. Timpmann, A. Freiberg and V. Sundström 194 (1995) 275

Energy transfer between antenna complexes in the purple sulfur bacteria *Chromatium tepidum* and *Chromatium vinosum*, J.T.M. Kennis, T.J. Aartsma and J. Amesz 194 (1995) 285

Energy transfer in photosystem I. Time resolved fluorescence of the native photosystem I complex and its core complex, L.-O. Pålsson, S.E. Tjus, B. Andersson and T. Gillbro 194 (1995) 291

Temperature dependent hole burning of the 684 nm chlorophyll *a* of the isolated reaction center of Photosystem II: confirmation of the linker model, H.-C. Chang, G.J. Small and R. Jankowiak 194 (1995) 323

EPR properties of the four hemes in the cytochrome subunit of reaction centres from *Rhodopseudomonas viridis*: characterization of the individual hemes, O. Kaminskaya, P.J. Bratt and M.C.W. Evans 194 (1995) 335

Differences in the binding of the primary quinone acceptor in Photosystem I and reaction centres of *Rhodobacter Sphaeroides*-R26 studied with transient EPR spectroscopy, A. van der Est, I. Sieckmann, W. Lubitz and D. Stehlik 194 (1995) 349
Time-resolved W-band (95 GHz) EPR spectroscopy of Zn-substituted reaction centers of *Rhodobacter sphaeroides* R-26, T.F. Prisner, A. van der Est, R. Bittl, W. Lubitz, D. Stehlik and K. Möbius 194 (1995) 361
FTIR spectroscopy of the photoreduction of the bacteriopheophytin electron acceptor in reaction centers of *Rb. sphaeroides* and *Rps. viridis*, E. Nabedryk, S. Andrianambinintsoa, D. Dejonghe and J. Breton 194 (1995) 371
Triplet–singlet difference spectra of *Rps. viridis* recorded with magneto-optical difference spectroscopy at 1.2–286 K. Temperature dependence of position and width of the long-wavelength absorption band, P. Gast, E.J. Lous and A.J. Hoff 194 (1995) 387
Temperature dependence of electron–vibronic spectra of photosynthetic systems. Computer simulations and comparison with experiment, T. Pullerits, R. Monshouwer, F. van Mourik and R. van Grondelle 194 (1995) 395
Exchange of chloride by bromide in the manganese Photosystem-II complex studied by cw- and pulsed-EPR, A. Boussac 194 (1995) 409
ENDOR and ESEEM of the ^{15}N labelled radical cations of chlorophyll **a** and the primary donor P_{700} in Photosystem I, H. Käß, E. Bittersmann-Weidlich, L.-E. Andréasson, B. Bönigk and W. Lubitz 194 (1995) 419
Fluoride substitution in the Mn cluster from Photosystem II: EPR and X-ray absorption spectroscopy studies, V.J. DeRose, M.J. Latimer, J.-L. Zimmermann, I. Mukerji, V.K. Yachandra, K. Sauer and M.P. Klein 194 (1995) 443
Primary processes in isolated Photosystem II reaction centres probed by magic angle transient absorption spectroscopy, D.R. Klug, T. Rech, D.M. Joseph, J. Barber, J.R. Durrant and G. Porter 194 (1995) 433

Microscopic systems

Molecules (neutral and ionic)

Double ionization of the propyne molecule to ground and electronically excited states of the doubly charged ion, S.R. Andrews, F.M. Harris and D.E. Parry 194 (1995) 215

-diatomic

Calculation of the asymptotic interaction and modelling of the potential energy curves of OH and OH^+, A.J.C. Varandas and A.I. Voronin 194 (1995) 91

-small polyatomics

Character and spectra of triplet states in short polyenes, B.F. Minaev, D. Jonsson, P. Norman and H. Ågren 194 (1995) 19
Nonadiabatic coupling of the 1 $^1A''$ and 2 $^1A''$ states of ozone, T. Neuheuser, N. Sukumar and S.D. Peyerimhoff 194 (1995) 45
Absolute UV and Soft X-ray photoabsorption of ethylene by high resolution dipole (e, e) spectroscopy, G. Cooper, T.N. Olney and C.E. Brion 194 (1995) 175

-aromatics

A theoretical investigation of solvatochromism. Application to merocyanines similar to colored forms obtained by flash-photolysis of spiropyrans, A. Botrel, B. Aboab, F. Corre and F. Tonnard 194 (1995) 101

Densities of states and band widths of excitons in anthracene microcrystallites embedded in PMMA, A.H. Matsui, K. Mizuno, O. Nishi, Y. Matsushima, M. Shimizu, T. Goto and M. Takeshima 194 (1995) 167

-other large

Tunneling splittings in model 2D potentials. II. $V(X, Y) = \lambda(X^2 - X_0^2)^2 - CX^2(Y - Y_0) + \frac{1}{2}\Omega^2(Y - Y_0 + CX_0^2/\Omega^2)^2 - C^2X_0^4/2\Omega^2$, V.A. Benderskii, S.Yu. Grebenshchikov and G.V. Mil'nikov 194 (1995) 1

A theoretical investigation of solvatochromism. Application to merocyanines similar to colored forms obtained by flash-photolysis of spiropyrans, A. Botrel, B. Aboab, F. Corre and F. Tonnard 194 (1995) 101

The application of the energy gap law to the S_1 energies and dynamics of carotenoids, V. Chynwat and H.A. Frank 194 (1995) 237

-polymeric and biological

Ultrafast energy transfer in light-harvesting chlorosomes from the green sulfur bacterium *Chlorobium tepidum*, S. Savikhin, P.I. van Noort, Y. Zhu, S. Lin, R.E. Blankenship and W.S. Struve 194 (1995) 245

Femtosecond transient absorption spectroscopy on the light-harvesting Chl *a*/*b* protein complex of Photosystem II at room temperature and 12 K, T. Bittner, G.P. Wiederrecht, K.-D. Irrgang, G. Renger and M.R. Wasielewski 194 (1995) 311

High-field EPR on the primary electron donor cation radical in single crystals of heterodimer mutant reaction centers of photosynthetic bacteria – first characterization of the *G*-tensor, M. Huber and J.T. Törring 194 (1995) 379

Molecular aggregates

Influence of dichotomic colored energy fluctuations on excitonic optical line shapes of trimers and tetramers, Ch. Warns, I. Barvík, P. Reineker and Th. Neidlinger 194 (1995) 117

Time-resolved W-band (95 GHz) EPR spectroscopy of Zn-substituted reaction centers of *Rhodobacter sphaeroides* R-26, T.F. Prisner, A. van der Est, R. Bittl, W. Lubitz, D. Stehlik and K. Möbius 194 (1995) 361

-dimers

Transient absorption changes of a degenerate dimer induced by exciton scattering; implications for Photosystem II of photosynthesis, J.P.M. Schelvis and T.J. Aartsma 194 (1995) 303

Temperature dependence of electron–vibronic spectra of photosynthetic systems. Computer simulations and comparison with experiment, T. Pullerits, R. Monshouwer, F. van Mourik and R. van Grondelle 194 (1995) 395

-complexes

A multiple scattering EXAFS study of organometallic compounds: $W(CO)_6$ and (1,3,5-trimethylbenzene)$W(CO)_3$, R. Crüsemann, F. Bökman, V. Fritzsche and H. Bertagnolli 194 (1995) 81

Exciton theory of spectra and energy transfer in photosynthesis: spectral hole burning in the antenna of purple bacteria, T.V. Dracheva, V.I. Novoderezhkin and A.P. Razjivin 194 (1995) 223

Optical and optically detected magnetic resonance investigation on purple photosynthetic bacterial antenna complexes, A. Angerhofer, F. Bornhäuser, A. Gall and R.J. Cogdell 194 (1995) 259

Primary processes in isolated Photosystem II reaction centres probed by magic angle transient absorption spectroscopy, D.R. Klug, T. Rech, D.M. Joseph, J. Barber, J.R. Durrant and G. Porter 194 (1995) 433

Quasiparticles (including excitons)
Influence of dichotomic colored energy fluctuations on excitonic optical line shapes of trimers and tetramers, Ch. Warns, I. Barvík, P. Reineker and Th. Neidlinger 194 (1995) 117

Phenomena

Molecular structure
A multiple scattering EXAFS study of organometallic compounds: $W(CO)_6$ and (1,3,5-trimethylbenzene)$W(CO)_3$, R. Crüsemann, F. Bökman, V. Fritzsche and H. Bertagnolli 194 (1995) 81
A theoretical investigation of solvatochromism. Application to merocyanines similar to colored forms obtained by flash-photolysis of spiropyrans, A. Botrel, B. Aboab, F. Corre and F. Tonnard 194 (1995) 101
Fluoride substitution in the Mn cluster from Photosystem II: EPR and X-ray absorption spectroscopy studies, V.J. DeRose, M.J. Latimer, J.-L. Zimmermann, I. Mukerji, V.K. Yachandra, K. Sauer and M.P. Klein 194 (1995) 443

Vibrations and rotations of molecules
Molecular adsorption on ionic substrates: characterization of terrace and step sites, S. Briquez, A. Lakhlifi, S. Picaud and C. Girardet 194 (1995) 65
Calculation of the asymptotic interaction and modelling of the potential energy curves of OH and OH^+, A.J.C. Varandas and A.I. Voronin 194 (1995) 91

Electronic structure and states
Character and spectra of triplet states in short polyenes, B.F. Minaev, D. Jonsson, P. Norman and H. Ågren 194 (1995) 19
Nonadiabatic coupling of the 1 $^1A''$ and 2 $^1A''$ states of ozone, T. Neuheuser, N. Sukumar and S.D. Peyerimhoff 194 (1995) 45
Calculation of the asymptotic interaction and modelling of the potential energy curves of OH and OH^+, A.J.C. Varandas and A.I. Voronin 194 (1995) 91
A theoretical investigation of solvatochromism. Application to merocyanines similar to colored forms obtained by flash-photolysis of spiropyrans, A. Botrel, B. Aboab, F. Corre and F. Tonnard 194 (1995) 101
Densities of states and band widths of excitons in anthracene microcrystallites embedded in PMMA, A.H. Matsui, K. Mizuno, O. Nishi, Y. Matsushima, M. Shimizu, T. Goto and M. Takeshima 194 (1995) 167
Double ionization of the propyne molecule to ground and electronically excited states of the doubly charged ion, S.R. Andrews, F.M. Harris and D.E. Parry 194 (1995) 215
The application of the energy gap law to the S_1 energies and dynamics of carotenoids, V. Chynwat and H.A. Frank 194 (1995) 237
Triplet–singlet difference spectra of *Rps. viridis* recorded with magneto-optical difference spectroscopy at 1.2–286 K. Temperature dependence of position and width of the long-wavelength absorption band, P. Gast, E.J. Lous and A.J. Hoff 194 (1995) 387

ENDOR and ESEEM of the ^{15}N labelled radical cations of chlorophyll **a** and the primary donor P_{700} in Photosystem I, H. Käß, E. Bittersmann-Weidlich, L.-E. Andréasson, B. Bönigk and W. Lubitz 194 (1995) 419

Electric and magnetic properties

High-field EPR on the primary electron donor cation radical in single crystals of heterodimer mutant reaction centers of photosynthetic bacteria – first characterization of the *G*-tensor, M. Huber and J.T. Törring 194 (1995) 379

Exchange of chloride by bromide in the manganese Photosystem-II complex studied by cw- and pulsed-EPR, A. Boussac 194 (1995) 409

Spin splittings

Time-resolved W-band (95 GHz) EPR spectroscopy of Zn-substituted reaction centers of *Rhodobacter sphaeroides* R-26, T.F. Prisner, A. van der Est, R. Bittl, W. Lubitz, D. Stehlik and K. Möbius 194 (1995) 361

Optical activity

Fluorescence-detected two-photon circular dichroism of Gd^{3+} in trigonal $Na_3[Gd(C_4H_4O_5)_3] \cdot 2NaClO_4 \cdot 6H_2O$, K.E. Gunde and F.S. Richardson 194 (1995) 195

Molecular interactions

Calculation of the asymptotic interaction and modelling of the potential energy curves of OH and OH^+, A.J.C. Varandas and A.I. Voronin 194 (1995) 91

Transient absorption changes of a degenerate dimer induced by exciton scattering; implications for Photosystem II of photosynthesis, J.P.M. Schelvis and T.J. Aartsma 194 (1995) 303

FTIR spectroscopy of the photoreduction of the bacteriopheophytin electron acceptor in reaction centers of *Rb. sphaeroides* and *Rps. viridis*, E. Nabedryk, S. Andrianambinintsoa, D. Dejonghe and J. Breton 194 (1995) 371

Spectral bandshapes and intensities

Absolute UV and Soft X-ray photoabsorption of ethylene by high resolution dipole (e, e) spectroscopy, G. Cooper, T.N. Olney and C.E. Brion 194 (1995) 175

Coupling of electronic and nuclear motion

Nonadiabatic coupling of the $1\ ^1A''$ and $2\ ^1A''$ states of ozone, T. Neuheuser, N. Sukumar and S.D. Peyerimhoff 194 (1995) 45

Temperature dependence of electron–vibronic spectra of photosynthetic systems. Computer simulations and comparison with experiment, T. Pullerits, R. Monshouwer, F. van Mourik and R. van Grondelle 194 (1995) 395

Energy transfer processes

Influence of dichotomic colored energy fluctuations on excitonic optical line shapes of trimers and tetramers, Ch. Warns, I. Barvík, P. Reineker and Th. Neidlinger 194 (1995) 117

Energy transfer processes and surface corrugation: a combined collision dynamics and experimental study of the Xe–GaSe(001) system, S. Iannotta, C. Gravili, A. Boschetti, A. Cagol and M. Cacciatore 194 (1995) 133

Vibrational energy dependence of nonradiative decay rate: triplet benzene studied by time-resolved and steady-state photosensitized phosphorescence, Y. Ide and T. Hikida 194 (1995) 159

Exciton theory of spectra and energy transfer in photosynthesis: spectral hole burning in the antenna of purple bacteria, T.V. Dracheva, V.I. Novoderezhkin and A.P. Razjivin 194 (1995) 223
The application of the energy gap law to the S_1 energies and dynamics of carotenoids, V. Chynwat and H.A. Frank 194 (1995) 237
Ultrafast energy transfer in light-harvesting chlorosomes from the green sulfur bacterium *Chlorobium tepidum*, S. Savikhin, P.I. van Noort, Y. Zhu, S. Lin, R.E. Blankenship and W.S. Struve 194 (1995) 245
Energy trapping and detrapping in the photosynthetic bacterium *Rhodopseudomonas viridis*: transfer-to-trap-limited dynamics, K. Timpmann, A. Freiberg and V. Sundström 194 (1995) 275
Energy transfer between antenna complexes in the purple sulfur bacteria *Chromatium tepidum* and *Chromatium vinosum*, J.T.M. Kennis, T.J. Aartsma and J. Amesz 194 (1995) 285
Energy transfer in photosystem I. Time resolved fluorescence of the native photosystem I complex and its core complex, L.-O. Pålsson, S.E. Tjus, B. Andersson and T. Gillbro 194 (1995) 291
Femtosecond transient absorption spectroscopy on the light-harvesting Chl *a*/*b* protein complex of Photosystem II at room temperature and 12 K, T. Bittner, G.P. Wiederrecht, K.-D. Irrgang, G. Renger and M.R. Wasielewski 194 (1995) 311
Temperature dependent hole burning of the 684 nm chlorophyll *a* of the isolated reaction center of Photosystem II: confirmation of the linker model, H.-C. Chang, G.J. Small and R. Jankowiak 194 (1995) 323
Primary processes in isolated Photosystem II reaction centres probed by magic angle transient absorption spectroscopy, D.R. Klug, T. Rech, D.M. Joseph, J. Barber, J.R. Durrant and G. Porter 194 (1995) 433

Molecular photophysical processes
Influence of dichotomic colored energy fluctuations on excitonic optical line shapes of trimers and tetramers, Ch. Warns, I. Barvík, P. Reineker and Th. Neidlinger 194 (1995) 117
Absolute UV and Soft X-ray photoabsorption of ethylene by high resolution dipole (e, e) spectroscopy, G. Cooper, T.N. Olney and C.E. Brion 194 (1995) 175
Differences in the binding of the primary quinone acceptor in Photosystem I and reaction centres of *Rhodobacter Sphaeroides*-R26 studied with transient EPR spectroscopy, A. van der Est, I. Sieckmann, W. Lubitz and D. Stehlik 194 (1995) 349
Time-resolved W-band (95 GHz) EPR spectroscopy of Zn-substituted reaction centers of *Rhodobacter sphaeroides* R-26, T.F. Prisner, A. van der Est, R. Bittl, W. Lubitz, D. Stehlik and K. Möbius 194 (1995) 361
Triplet–singlet difference spectra of *Rps. viridis* recorded with magneto-optical difference spectroscopy at 1.2–286 K. Temperature dependence of position and width of the long-wavelength absorption band, P. Gast, E.J. Lous and A.J. Hoff 194 (1995) 387

Intramolecular dynamics
A simple model for proton transfer, P.M. Kiefer, V.B.P. Leite and R.M. Whitnell 194 (1995) 33

-radiationless transitions
A simple model for proton transfer, P.M. Kiefer, V.B.P. Leite and R.M. Whitnell 194 (1995) 33
The application of the energy gap law to the S_1 energies and dynamics of carotenoids, V. Chynwat and H.A. Frank 194 (1995) 237

Luminescence spectra, yields and lifetimes
Solvent relaxation of oxazine-4 in 2-methyltetrahydrofuran, E. Görlach, H. Gygax, P. Lubini and U.P. Wild 194 (1995) 185

Coherence loss processes
Transient absorption changes of a degenerate dimer induced by exciton scattering; implications for Photosystem II of photosynthesis, J.P.M. Schelvis and T.J. Aartsma 194 (1995) 303

Multiphoton phenomena
Fluorescence-detected two-photon circular dichroism of Gd^{3+} in trigonal $Na_3[Gd(C_4H_4O_5)_3] \cdot 2NaClO_4 \cdot 6H_2O$, K.E. Gunde and F.S. Richardson 194 (1995) 195

Reactions (including dissociation)
Vibrational energy dependence of nonradiative decay rate: triplet benzene studied by time-resolved and steady-state photosensitized phosphorescence, Y. Ide and T. Hikida 194 (1995) 159

-gas phase
Vibrational energy dependence of nonradiative decay rate: triplet benzene studied by time-resolved and steady-state photosensitized phosphorescence, Y. Ide and T. Hikida 194 (1995) 159

-condensed phase
The thermal ageing of poly(3,4-ethylenedioxythiophene). An investigation by X-ray absorption and X-ray photoelectron spectroscopy, I. Winter, C. Reese, J. Hormes, G. Heywang and F. Jonas 194 (1995) 207

-photochemical
Differences in the binding of the primary quinone acceptor in Photosystem I and reaction centres of *Rhodobacter Sphaeroides*-R26 studied with transient EPR spectroscopy, A. van der Est, I. Sieckmann, W. Lubitz and D. Stehlik 194 (1995) 349

Tunnelling
Tunneling splittings in model 2D potentials. II. $V(X, Y) = \lambda(X^2 - X_0^2)^2 - CX^2(Y - Y_0) + \frac{1}{2}\Omega^2(Y - Y_0 + CX_0^2/\Omega^2)^2 - C^2X_0^4/2\Omega^2$, V.A. Benderskii, S.Yu. Grebenshchikov and G.V. Mil'nikov 194 (1995) 1
A simple model for proton transfer, P.M. Kiefer, V.B.P. Leite and R.M. Whitnell 194 (1995) 33

Electron transfer
Temperature dependent hole burning of the 684 nm chlorophyll *a* of the isolated reaction center of Photosystem II: confirmation of the linker model, H.-C. Chang, G.J. Small and R. Jankowiak 194 (1995) 323
EPR properties of the four hemes in the cytochrome subunit of reaction centres from *Rhodopseudomonas viridis*: characterization of the individual hemes, O. Kaminskaya, P.J. Bratt and M.C.W. Evans 194 (1995) 335
Differences in the binding of the primary quinone acceptor in Photosystem I and reaction centres of *Rhodobacter Sphaeroides*-R26 studied with transient EPR spectroscopy, A. van der Est, I. Sieckmann, W. Lubitz and D. Stehlik 194 (1995) 349

FTIR spectroscopy of the photoreduction of the bacteriopheophytin electron acceptor in reaction centers of *Rb. sphaeroides* and *Rps. viridis*, E. Nabedryk, S. Andrianambinintsoa, D. Dejonghe and J. Breton 194 (1995) 371
High-field EPR on the primary electron donor cation radical in single crystals of heterodimer mutant reaction centers of photosynthetic bacteria – first characterization of the *G*-tensor, M. Huber and J.T. Törring 194 (1995) 379
Primary processes in isolated Photosystem II reaction centres probed by magic angle transient absorption spectroscopy, D.R. Klug, T. Rech, D.M. Joseph, J. Barber, J.R. Durrant and G. Porter 194 (1995) 433

Ionization (including Rydberg states)
Double ionization of the propyne molecule to ground and electronically excited states of the doubly charged ion, S.R. Andrews, F.M. Harris and D.E. Parry 194 (1995) 215

Isotopic effects
FTIR spectroscopy of the photoreduction of the bacteriopheophytin electron acceptor in reaction centers of *Rb. sphaeroides* and *Rps. viridis*, E. Nabedryk, S. Andrianambinintsoa, D. Dejonghe and J. Breton 194 (1995) 371
Exchange of chloride by bromide in the manganese Photosystem-II complex studied by cw- and pulsed-EPR, A. Boussac 194 (1995) 409

Surface effects and catalysis
Molecular adsorption on ionic substrates: characterization of terrace and step sites, S. Briquez, A. Lakhlifi, S. Picaud and C. Girardet 194 (1995) 65
Energy transfer processes and surface corrugation: a combined collision dynamics and experimental study of the Xe–GaSe(001) system, S. Iannotta, C. Gravili, A. Boschetti, A. Cagol and M. Cacciatore 194 (1995) 133

Structure of solids and liquids
The thermal ageing of poly(3,4-ethylenedioxythiophene). An investigation by X-ray absorption and X-ray photoelectron spectroscopy, I. Winter, C. Reese, J. Hormes, G. Heywang and F. Jonas 194 (1995) 207

Phase transitions
Vibrational study of various crystalline phases of thallium dihydrogen arsenate TlH_2AsO_4. Comparison with thallium dihydrogen phosphate TlH_2PO_4, Z. Ouafik, N. Le Calvé and B. Pasquier 194 (1995) 145
